Revision 0.81

### SINGLE FREQUENCY LASER DIODES **Distributed Feedback Laser**

#### General Product Information

| Product   | Application               |
|---|---------------------------|
| 780 nm DFB Laser  | Spectroscopy (Rb D2 line) |
| with hermetic 8-Pin TO Package (RoHS compliant)               | Metrology                 |
| including Monitor Diode, Thermoelectric Cooler and Thermistor | THz Generation            |
|   |                           |

#### Absolute Maximum Ratings

| Symbol           | Unit  | min  | typ   | max   |
|------------------|---|--|---|---|
| Ts               | °C  | -40  |   | 85  |
| T <sub>C</sub>   | °C  | -20  |   | 75  |
| T <sub>LD</sub>  | °C  | 0  |   | 50  |
| l <sub>F</sub>   | mA  |  |   | 200   |
| V <sub>R</sub>   | V   |  |   | 2   |
| P <sub>opt</sub> | mW  |  |   | 100   |
| I <sub>TEC</sub> | А   |  |   | 1.0   |
| V <sub>TEC</sub> | V   |  |   | 1.0   |
|                  | T <sub>s</sub><br>T <sub>c</sub><br>T <sub>LD</sub><br>I <sub>F</sub><br>V <sub>R</sub><br>P <sub>opt</sub><br>I <sub>TEC</sub> | T <sub>s</sub> °C<br>T <sub>C</sub> °C<br>T <sub>LD</sub> °C<br>I <sub>F</sub> mA<br>V <sub>R</sub> V<br>P <sub>opt</sub> mW<br>I <sub>TEC</sub> A | $\begin{array}{c ccccccccccccccccccccccccccccccccccc$ | $\begin{array}{c ccccccccccccccccccccccccccccccccccc$ |

#### **Recommended Operational Conditions**

| Parameter                             | Symbol            | Unit | min | typ | max |
|---------------------------------------|-------------------|------|-----|-----|-----|
| Operational Temperature at Case       | T <sub>case</sub> | °C   | -20 |     | 65  |
| Operational Temperature at Laser Chip | T <sub>LD</sub>   | °C   | 5   |     | 45  |
| Forward Current                       | I <sub>F</sub>    | mA   |     |     | 180 |
| Output Power                          | Popt              | mW   | 20  |     | 80  |

#### Characteristics at T<sub>LD</sub> = 25° C at BOL

| Parameter                             | Symbol           | Unit    | min | typ    | max |
|---------------------------------------|------------------|---------|-----|--------|-----|
| Center Wavelength                     | $\lambda_{c}$    | nm      | 779 | 780    | 781 |
| Target Wavelength                     | $\lambda_{T}$    | nm      |     | 780.24 |     |
| Linewidth (FWHM)                      | Δλ               | MHz     |     | 0.6    | 1   |
| Sidemode Supression Ratio             | SMSR             | dB      | 30  | 45     |     |
| Temperature Coefficient of Wavelength | d $\lambda$ / dT | nm / K  |     | 0.06   |     |
| Current Coefficient of Wavelength     | dλ / dI          | nm / mA |     | 0.003  |     |

#### Measurement Conditions / Comments

Stress in excess of one of the Absolute Maximum Ratings may damage the laser. Please note that a damaging optical power level may occur although the maximum current is not reached. These are stress ratings only, and functional operation at these or any other conditions beyond those indicated under Recommended Operational Conditions is not implied.

#### Measurement Conditions / Comments

measured by integrated Thermistor

### SINGLE FREQUENCY LASER DIODES **Distributed Feedback Laser**

#### **Typical Measurement Results**

Output Power vs. Current

Performance figures, data and any illustrative material provided in this specification are typical and must be specifically confirmed in writing by eagleyard Photonics before they become applicable to any particular order or contract. In accordance with the eagleyard Photonics policy of continuous improvement specifications may change without notice.

#### Unpacking, Installation and Laser Safety

eagleyard Photonics GmbH

Unpacking the laser diodes should only be done at electrostatic safe workstations (EPA). Though protection against electro static discharge (ESD) is implemented in the laser package, charges may occur at surfaces. Please store this product in its original package at a dry, clean place until final use. During device installation, ESD protection has to be maintained.

The DFB laser is sensitive against optical feedback, so an optical isolator may be required in order to avoid any disturbance of the emission spectrum. Operating at moderate temperatures on proper heat sinks will contribute to a long lifetime of the diode.

Avoid direct and/or indirect exposure to the free running beam. Collimating and focussing the free running beam with optics as common in optical instruments will increase threat to the human eye.

Performance figures, data and any illustrative material provided in this specification are typical and must be specifically confirmed in writing by eagleyard Photonics before they become applicable to any particular order or contract. In accordance with the eagleyard Photonics policy of continuous improvement specifications may change without notice.
