Revision 0.70

TAPERED AMPLIFIER Semiconductor Optical Amplifier

General Product Information

| Product | Application |
|--|--------------|
| 765 nm Tapered Amplifier | Spectroscopy |
| 14 Pin Butterfly Package | |
| with PM Fiber and FC/APC Connector (Input) | |
| and collimated Output Beam | |

Absolute Maximum Ratings

| Parameter | Symbol | Unit | min | typ | max |
|---------------------------------|------------------|------|-----|-----|-----|
| Storage Temperature | Τ _s | | -40 | | 85 |
| Operational Temperature at Case | Tc | °C | -20 | | 75 |
| Forward Current | I _F | А | | | 5 |
| Reverse Voltage | V _R | V | | | 2 |
| Output Power | Popt | W | | | 1.6 |
| TEC Current | I _{TEC} | А | | | 5 |
| TEC Voltage | V_{TEC} | V | | | 7 |
| | | | | | |

Recommended Operational Conditions

| Parameter | Symbol | Unit | min | typ | max |
|---------------------------------|-------------------|------|-----|-----|-----|
| Operational Temperature at Case | T _{case} | °C | 0 | | 50 |
| Operational Temperature at Chip | T_{LD} | °C | 10 | 25 | 35 |
| Forward Current | I _F | А | | | 4 |
| Input Power | P _{opt} | mW | 10 | | 50 |
| Output Power | Popt | W | | | 1.5 |

Characteristics at T_{LD}

| Parameter | Symbol | Unit | min | typ | max |
|---------------------------------|----------------------|------|-----|------|-----|
| Wavelength | λ | nm | | 765 | |
| Gain Width (FWHM) | Δλ | nm | | 6 | |
| Operational Current | I _{Op Gain} | А | | | 3 |
| Output Power | Popt | W | 1.5 | | |
| Polarization | | | | TM | |
| Amplification | G | dB | | 15 | |
| Temp. Coefficient of Wavelength | dλ / dT | nm/K | | 0.25 | |

Measurement Conditions / Comments

Stress in excess of one of the Absolute Maximum Ratings may damage the laser. Please note that a damaging optical power level may occur although the maximum current is not reached. These are stress ratings only, and functional operation at these or any other conditions beyond those indicated under Recommended Operational Conditions is not implied.

| Measurement Conditions / Comments |
|---|
| |

Measurement Conditions / Comments

Unpacking, Installation and Laser Safety

Unpacking the taperd amplifier should only be done at electrostatic safe workstations (EPA). Though protection against electro static discharge (ESD) is implemented in the laser package, charges may occur at surfaces. Please store this product in its original package at a dry, clean place until final use. During device installation, ESD protection has to be maintained.

The TPA diode type is known to be sensitive against thermal stress. It should not be operated without appropriate injection from a seed laser. Operating at moderate temperatures on proper heat sinks will contribute to a long lifetime of the diode.

This amplifier is designed for the setup of MOPA systems. Appropriate seed lasers are DFB lasers of the type EYP-DFB-xxxx-xxxxx-1500-BFY12-000x with matching wavelengths. An external fiber isolator should be used between seed laser and amplifier in order to suppress backreflections that may disturb the

Each tapered amplifier will come with an individual test protocol verifying the parameters given in this document.
